

24.1" Color LCD Monitor

RadiForce® MX243W

24.1-inch widescreen medical monitor with DICOM® Part 14 calibration for viewing medical images.

View More with Widescreen

The monitor has a resolution of 1920 x 1200 pixels and 16:10 aspect ratio. This provides more space for comfortably working with images, tool palettes, and other windows compared to conventional square monitors.

Display Both Monochrome and Color

The Hybrid Gamma PXL function automatically distinguishes between monochrome and color images pixel by pixel, creating a hybrid display where each pixel has optimum grayscale.

Elegant Cabinet Design

The monitor's cabinet is designed with rounded corners and elegant curves on the back to present a gentle aesthetic and facilitate a comforting environment for patients and medical staff.

Save Work Space with Sleek Cabinet Design

With the new monitor cabinet and stand design, compared to its predecessor, the monitor's width and depth are reduced by 23 mm and 45 mm respectively. This results in a monitor that takes up 24% less space, giving you more room for other tasks.

Make the Precise Diagnosis

EIZO carefully measures and sets each grayscale tone to create a monitor compliant with DICOM Part 14. This ensures the consistent shading possible, allowing for the accurate diagnosis.

Maintain the Precision

Perform a simplified calibration compliant with DICOM Part 14 using the bundled RadiCS LE quality control software. RadiCS LE corrects the brightness and grayscale tones of the monitor to maintain image accuracy and consistency over time.

Select the Ideal Mode for Modalities

The CAL Switch function allows you to choose various modes for different modalities such as CR, CT, and endoscopy. Using the bundled RadiCS LE software, modes can be set to automatically switch to optimal image viewing conditions.

Hassle-Free Multi-Monitor Configuration

Using the DisplayPort connection, you can drive several monitors in a daisy chain sequence. This allows you to configure a multi-monitor setup without the complicated hassle of excessive cabling.

A graphics board that supports daisy chain is necessary.

Conserve to Preserve

The monitor is made of approximately 19% recycled plastic. This cuts down on the amount of plastic waste going into the environment, conserves resources, and promotes reuse of materials for preserving our natural ecosystems.

Cushioning Environmental Impact

EIZO is moving away from using plastic and styrofoam in its packaging to reduce environmental impact. The monitor is safely packed using molded pulp, which is made from recycled cardboard and newspaper, and cables are wrapped in environmentally friendly pulp sheet instead of plastic bags.
