## Features and Benefits

The AK-4400-G is a high quality, highly reliable keyboard with notebook style key field and integrated touchpad for use in industry, apparatus, tool and plant construction, server and kiosk as well as healthcare applications. The big touchpad allows smooth and precise control of the cursor movement also for untrained operators. The touchpad is maintenance-free and does not contain any wearing parts.

While using scissor balancing technology with open slide bearings, the keycaps are leveled against all 4 corners and such ensure excellent key guidance and feel, also with excentric actuation. With its closed contact system, the AK-4400-G is inured to moisture and dust. The flat, sideways slant keys allow for easy cleaning of the key field. For extended protection, you may also use our keyboard protection cover AK-F4400-G.
